

Cerebrex Mind Activator Instructions

Well, I hope that you already have enough understanding of how to meditate and how to use a pendulum.

It is impossible to try to teach you all about those things in this small instruction. There are many, many good books and Internet websites that have this kind of information for free.

Try to use one of your favorite search engines, type in words like; Radionics, Psionics, Dowsing, sticking plate etc. and you will certainly find what you were looking for.

Now, HOW TO USE this device;

First, place this box in front of you with the color dial pointing towards you, now you see, from the left to the right: The brass intention plate with 3 dials , the focus symbol (the blue lines in the middle) and the brass target plate.

The focus symbol is used to get your information from, we come to that later.

First, before any operation, you must know very well what you are going to do, if you are only playing with it you will only generate chaos and this chaos may cause headaches, if you don't care about headaches, go on, play with it....

Okay, you know what to do; you want to help, lets say, your uncle Charlie who has a headache all day long, all week etc.

First, write down on a small piece of paper that your uncle is healed, his headache is gone.

Place, or tape, this 'wish' on the intention plate, that's right, the one on the left.

Second, try to get a so-called witness which represents uncle Charlie, that can be a photograph of uncle Charlie, his signature, some hairs, a fingernail or a blood sample. Place (or tape) this witness on the target plate.

Now you must set the dials because you want the LEFT go into the RIGHT, you want to send the healing intend, written down on the piece of paper (or even represented by a homeopathic remedy), placed on the left copper plate, to the witness, representing your uncle Charlie.

To set the dials, you must know HOW!! To what numbers should the dials be turned.. How can I get this information, you may ask. It is not as difficult as it seems, there are 3 methods (and first make sure all dials are set to the number 1, to the left) before you start any of those methods stare for 3 minutes into the middle of the focus-symbol with the blue lines, this way you come in "contact" with the device. After you have done this choose a color with the color dial and leave it. The device will tell you what color it should be (don't believe it? Try it out!!!!)

First method: use the pendulum.

Hold the pendulum app. 4 inches above the focus-symbol with your right hand (if you are left-handed, do this with your left hand),

It will start to move when you turn the first dial real slowly with the other hand. When the pendulum says YES to you, stop turning the dial, it is now set!!! Do the same with the other dials.

Second method: use the focus-symbol to find "sticks":

This is how to get so called sticks; slowly rub with one of the fingers of your right hand (or when you are left handed with your left hand) gently over the middle of the focus-symbol while turning the first dial slowly to the right with the other hand, when you feel your finger stops, you get a stick, and this means the same as when your pendulum says YES. So stop turning the dial when you get this 'stick', it means that the dial is now set!! Do the same with the other dials.

Third method: use your intuition;

Yes, no pendulums or sticks needed when you are sensitive enough. Just try it out, turn the dials to the right and stop turning when you 'know' you should stop.

You have set the dials, you turned the device on!!

Leave it alone for some hours. After a session is ended, please turn back the dials to 1 to turn the device off!!

It is not needed to use rates from those so-called rate-books, you do not need them, every situation is different in all aspects. Of course you are free to use this device as you wish, I can't, or even may, tell you what to do with it, but be careful, you may be surprised by its powers.
